**Minutes of the meeting held at 12.30 pm on 12.09.2018 under the
chairmanship of Hon'ble Minister, Revenue and DM in his office
Chamber of Odisha Legislative Assembly**

A meeting was held at 12.30 pm on 12.09.2018 under the chairmanship of Hon'ble Minister, Revenue and DM in his office Chamber of Odisha Legislative Assembly to discuss the modalities to ensure use of minor minerals drawn from authorized sources in different Government projects. Principal Secretary, R&DM Department, Secretary, Works Department, Director, Environment cum Special Secretary, F&E Department, Member Secretary, SPCB, EIC, Water Resources Department, Special Secretary, RD Department, Chief Engineer, Drainage and other officers from H&UD , C&T Department as at **annexure-1** attended the meeting.

At the outset, Principal Secretary, Revenue and DM Department informed that instances have come to the notice that many a time the project proponents/ user agencies/contractors are using minor minerals drawn from unauthorized sources for which Government is losing a huge amount of revenue towards royalty. Similarly, illegal stone mining is alleged to be rampant in the State and the crusher units are major end users of illegally lifted and transported stones from unauthorized sources. Sometime, the stone mafias are blasting rocks/stones using explosive materials without having valid explosive licenses, which at times endangers human life as well as to the environment. These are happening despite adequate instructions and guidelines issued by Government from time to time. In order to curb illegal use of sand and stones by the end users, it is felt imperative to develop a restrictive framework at the level of end users by different Departments/ Agencies. Hence this meeting with all concerned end user Departments has been convened to arrive at a standard framework to ensure use of materials from the authorized sources in all developmental and Government projects.

17
Hon'ble Minister, R&DM Department called upon the user Departments to ensure that the minor minerals used in developmental projects are drawn from authorized sources. Simultaneously, care should be taken that the project implementation does not suffer.

Participating in the discussion, EIC-cum, Secretary, Works Department informed that it is difficult to ascertain from which source the material is lifted at the time of Billing. But, royalty amount according to the estimated quantity is being deducted from the Bills of the contractors and the same is being deposited with tahasildars. As such, Government does not suffer the loss so far as royalty is concerned. However, fine cannot be collected at this stage as it will be highly subjective and may lead to legal complications. Hence, illegal lifting should be regulated at the source level.

After detailed discussion, following decisions were taken;

1. Mapping of all sand and stone sources shall be done through OR-SAC to ascertain the quantity of deposits and lifting of minerals on real-time basis.
2. In the bid document of all developmental and infrastructure projects, it will be provided that "Contractor is required to use the material from authorized sources only and he is to certify for the same." Accordingly, the concerned Departments will ensure obtaining such certificates at the time of passing the Bill.

The meeting ended with vote of thanks to the Chair and the participants.

Minister

Revenue and DM Department
